

Climate change adaptation 'whirlwind' presentation

Adaptation
Scotland
supporting climate change resilience

A short, interactive power point presentation to introduce climate change adaptation, past/current climate trends and future projections and begin the conversation about local adaptation.

Who is it for?

Any group that wants to better understand the impacts of climate change for their community and raise awareness of potential actions while collecting other local people's views and lived experiences of climate change.

What will you have as a result?

Improved awareness of the difference between climate change mitigation and adaptation; basic knowledge of past/current climate trends and future projections; an overview of the key consequences of climate change for Scotland, and suggestions and discussion prompts for what local adaptation actions may look like.

Template

How to use it

Go through the slides of this presentation with your group. Each slide with a green header can be used as an opportunity to pause for questions and discussion. If you are running this presentation with a larger group, consider embedding [Slido](#) or [Mentimeter](#) for your attendees to answer questions on from their own devices.
